

# AES ADVANCED MONITORING SYSTEM

Powered by ABI Advantage

## REAL-TIME ENERGY MONITORING

Studies have consistently shown that the best way to conserve electricity use is to show people precisely how much they are using. With American Energy Services' Advanced Monitoring System (AMS) powered by ABI Advantage, you can track your energy usage down to the zone level for multiple loads (i.e., lighting, HVAC, etc.), and drive energy conservation initiatives while monitoring their impact in real-time.

In addition, the AMS enables building owners to qualify for LEED Measurement & Verification (M&V) points. Meaningful graphics, analysis-based text/email alerts, and detailed reporting give you the answers, not just the details.

With up-to-the-minute accuracy and a user-friendly platform, you will be able to optimize your building's performance, predict maintenance needs, reduce energy use, and lower operating costs.

Easy-to-view reports keep you ahead of any underlying issues, while also allowing you to identify opportunities that might be undetectable in a basic audit.

Understanding your energy usage is the fastest and most reliable way to make informed and effective changes that lower your energy bills. Whether you're a commercial or industrial enterprise, government or educational institution, we'll help you see energy through a different lens.

### Product Highlights

- Real-time monitoring
- Pathway to reduced energy usage
- Data integration from multiple systems/sources
- Customizable performance alerts
- Equipment-level performance monitoring

### State-of-the-Art

With up-to-the-minute accuracy, AES' Advanced Monitoring System is fast becoming *the* standard in Energy Management & Verification.

### Advanced Analytics

AMS brings the power of Big Data straight to your facility, so you can access your energy usage at any time.

### User-Friendly

A flexible tool you access right from your browser. Configure to your exact needs and get just the information you need.

# Clear Solutions for Energy Efficiency

## AES COMMITMENT TO SERVICE

For over 15 years, American Energy Services has been a trusted provider of single and multi-product energy solutions. AES is dedicated to delivering **cost-effective energy solutions** and establishing long-term relationships with commercial and public customers based on exacting technical and ethical standards and achieving measurable results.

At AES we believe in earning the respect and trust of our clients, and after more than a decade of providing clients with full turnkey solutions we still hold fast to that foundational belief.

American Energy Services leverages **a national network** of AES offices and certified partners serving small businesses, Fortune 500 companies, government agencies, healthcare facilities, property management companies, and schools and universities.

Understanding the unique needs of your building is our priority. With this assessment, we are able to provide you with a plan to improve your environment as well as your budget.
